

# LUTON TABLE

**SU**  
CUSTOM  
FURNITURE

Inspired by Geometric Sculpturalism, the Roton table explores the tension between massive architectural forms and softened, organic edges. The design honors the "monolithic" philosophy, featuring a substantial marble slab that appears to float atop two powerful, pill-shaped pedestals. This juxtaposition of sharp horizontal planes and smooth vertical volumes creates a sense of structural permanence, transforming a functional surface into a piece of micro-architecture that anchors the modern living space.

Inspired by Geometric Sculpturalism, the Roton table explores the tension between massive architectural forms and softened, organic edges. The design honors the "monolithic" philosophy, featuring a substantial marble slab that appears to float atop two powerful, pill-shaped pedestals. This juxtaposition of sharp horizontal planes and smooth vertical volumes creates a sense of structural permanence, transforming a functional surface into a piece of micro-architecture that anchors the modern living space.

The craftsmanship of the Roton table centers on precision stone masonry and advanced diamond-polishing. Artisans meticulously select premium marble slabs, ensuring structural integrity before carving the distinct, pill-shaped pedestals. Using CNC technology and hand-finishing, the stone is ground through progressively finer grits to achieve a mirror-like, high-gloss surface. The final result relies on expert load-bearing engineering, allowing the heavy monolithic top to rest securely while maintaining its sleek, architectural silhouette.

# SELECTION MENU

STEP  
I

**Table Size:** available from  
L140 - L320 cm Length

## Table Top Configuration:

Rectangle

Rounded Edge

Capsule

Bloated
